

GEO WEEK 2018

KYOTO, JAPAN

Monday 29 October, 08.30-12.30

Identifying, communicating and delivering
the value of Earth Observations.
A regional approach.

Session 1

The importance of sustained EO activities at regional level

Side event Organised by GEO-CRADLE Project & EARSC

Scope of this panel discussion

- ❑ Discussion on different approaches and current plans around the coordination of EO activities at regional level
- ❑ Scaling up and replication of best practices in relation to capacity building
- ❑ Getting “programmatic” insights (from GEOSEC and EC EASME) on long-term actions supporting regional coordination

Questions to panellists

- ❑ Why is it important to have coordinated EO activities at regional level and what are the key challenges you see? [2-3 mins each]

Individual questions (5 mins each)

- ❑ In view of the adoption of the new GEO WP which are the main areas of focus for regional activities supported by GEO?
- ❑ In Europe, beyond the sub-regional and cross-border activities that are funded by the EU, what is the role of EuroGEOSS?
- ❑ GEO-CRADLE has been coordinating activities across three continents and introducing new methodologies to support capacity building. Which lessons learned should be shared, scaled up and replicated?

Open floor Q&A and Wrap-up by moderator [10 mins in total]

Thank you!
